

Groundbreaking Web-Based Application for Health Services Field

Mercury New Media built a system that streamlines data entry and patient management throughout the patient lifecycle. It also provides a centralized source of consistent and reliable patient information that is available to constituents 24/7. The system is easy to administer via a set of management reports and can be updated by the client as needed.

The client manages physical and occupational therapy clinics in disparate locations across the United States and Canada. Patient information was managed using a combination of manual and semi-automated processes. Updating patient information and distributing patient information to key parties was a cumbersome process.

OccuCare's Online Assessment Application enables rehabilitation clinics to provide their patients, physicians, case managers and employers with the most comprehensive documentation of their client's functional abilities and progress. Extremely fast documentation, immediate report generation, report customization, spell checking and industry standard calculations are hallmarks of the Online Assessment Application.

After using the Online Assessment Application within their nationwide network of clinics, OccuCare now markets the software as a web-based solution to other health care providers. Entirely browser-based, the Online Assessment Application operates on a subscription basis and requires no custom software to be installed on the user's computer.

OCCUCARE SYSTEMS & SOLUTIONS

The OAA control panel provides software users with a comprehensive view of system data.

Rich tabbed input forms facilitate speedy data input and editing.

Real-time data reporting provides views of system data from several viewpoints.

Web-Based Application Accessible Via Secure Login

OccuCare Systems and Solutions has provided medical professionals and employers with world class programming and workers' compensation cost reduction services since 1992. Throughout North America employers have realized up to a 75% reduction in their work comp costs while clinicians have been able to provide industry-leading services to their patients. OccuCare's business line continues to grow with new clients using the OccuCare Online Assessment Application.

"Mercury's professionalism and attention to detail from the first meeting was truly impressive! The final product exceeded our expectations and has vaulted our company into a leadership position."

Jim Mecham, National Director Application Sales

Results

- 40% reduction in time spent preparing documentation
- 50% improvement in therapist staff productivity
- Customer report turnaround time reduced to 24 hours
